About the Book

This textbook provides a comprehensive overview of the evaluation of mineral and energy projects, from the geological and engineering aspects to the economic, financial, and environmental considerations. It is designed for undergraduate and graduate students in mining engineering, petroleum

engineering, and other related fields, as well as for professionals working in the mineral and energy industries.

The book is divided into five parts:

1. Part 1:
2. Part 2: Geological and Engineering Aspects
3. Part 3: Economic and Financial Aspects
4. Part 4: Environmental Aspects
5. Part 5: Case Studies

Part 1 provides an overview of the mineral and energy industries, as well as the basic principles of project evaluation. Part 2 covers the geological and engineering aspects of mineral and energy projects, including exploration, mining, and processing. Part 3 covers the economic and financial aspects of mineral and energy projects, including capital budgeting, risk analysis, and project financing. Part 4 covers the environmental aspects of mineral and energy projects, including environmental impact assessment and mitigation.

Part 5 provides a number of case studies of mineral and energy projects from around the world. These case studies illustrate the application of the principles and methods discussed in the book to real-world projects.

Table of Contents

- 1.
2. Geological and Engineering Aspects

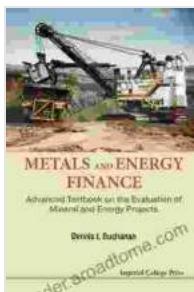

- Exploration
- Mining
- Processing
- Economic and Financial Aspects
 - Capital Budgeting
 - Risk Analysis
 - Project Financing
- Environmental Aspects
 - Environmental Impact Assessment
 - Mitigation
- Case Studies

Features

- Comprehensive coverage of the evaluation of mineral and energy projects
- Step-by-step approach to project evaluation
- Real-world case studies
- Color illustrations and diagrams
- End-of-chapter questions and exercises

Benefits

- Provides a comprehensive understanding of the evaluation of mineral and energy projects
- Helps students develop the skills needed to evaluate mineral and energy projects
