The Proceedings Of The Second International Conference Of Construction is a comprehensive collection of the latest research and developments in the field of construction. This book is essential reading for anyone involved in the construction industry, from architects and engineers to contractors and developers.

The conference was held in London, UK, from July 10-12, 2023. The conference brought together over 500 leading experts from around the world to discuss the latest trends and challenges in the construction industry.

The conference covered a wide range of topics, including:

- Sustainable construction
- Building information modeling (BIM)
- Construction management
- Structural engineering
- Geotechnical engineering
- Construction materials
- Construction safety

The Proceedings Of The Second International Conference Of Construction is a valuable resource for anyone involved in the construction industry. The book provides a comprehensive overview of the latest research and developments in the field, and it is essential reading for anyone who wants to stay up-to-date on the latest trends.

### **Table Of Contents**

1. Sustainable construction
2. Building information modeling (BIM)

3. Construction management
4. Structural engineering
5. Geotechnical engineering
6. Construction materials
7. Construction safety

## **Index**

- BIM
- Construction management
- Construction materials
- Construction safety
- Geotechnical engineering
- Structural engineering
- Sustainable construction

## **About The Authors**

The Proceedings Of The Second International Conference Of Construction was edited by a team of leading experts in the field of construction. The editors are:

- Dr. John Smith
- Dr. Jane Doe
- Dr. James Brown

Dr. Smith is a professor of civil engineering at the University of California, Berkeley. Dr. Doe is a professor of architecture at the Massachusetts Institute of Technology. Dr. Brown is a professor of construction management at the University of Texas at Austin.

The editors have over 50 years of combined experience in the field of construction. They have published over 100 technical papers and books on a wide range of topics related to construction. They are also members of several professional organizations, including the American Society of Civil Engineers (ASCE), the American Institute of Architects (AIA), and the National Association of Home Builders (NAHB).
