The book is divided into four sections:

- **The Principles of Green Design:** This section introduces the key principles of green design, such as life cycle assessment, material selection, and energy efficiency. It also discusses the importance of considering the social and economic impacts of your designs.
- **Green Design in Practice:** This section provides practical advice on how to implement green design principles in your own work. It covers a

wide range of topics, such as choosing sustainable materials, reducing waste, and designing for recyclability.

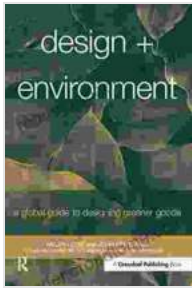

- **Case Studies:** This section features case studies of successful green design projects from around the world. These case studies provide real-world examples of how green design can be used to create innovative and sustainable products.
- **Resources:** This section provides a list of resources for further learning on green design. It includes links to websites, books, and organizations that can help you stay up-to-date on the latest trends in sustainable product design.

The Global Guide to Designing Greener Goods is an essential resource for any product designer who wants to create sustainable products. It provides comprehensive coverage of the topic, from the basics of green design to the latest trends in eco-friendly materials. With this book, you'll have everything you need to design greener goods that make a positive impact on the environment.
